

CLAIM AMENDMENTS

IN THE CLAIMS

This listing of the claims will replace all prior versions, and listing, of claims in the application or previous response to office action:

1-16. (Cancelled)

17. **(Currently Amended)** A mobile communication terminal for operation of at least two mobile radio communication systems in respectively associated mobile radio networks, comprising:

each said mobile radio communication system operable to provide a user of said mobile communication terminal with a plurality of services of different types, wherein said mobile communication terminal is connected to receive and effect further processing of a plurality of data records, wherein each said data record is associated with one respective type of said services, and wherein each of the at least two mobile radio communication systems provides the mobile communication terminal at least one service of the same service type; and

a plurality of service type lists, each service type list corresponding to a different one of the plurality of different service types, ~~the list for each particular service type comprising and listing only~~ services of ~~the same one~~ particular service type which are provided by any of said mobile radio networks, said services stored using said data records, said data records containing information used by said services to be assessed by a user.

18. **(Currently Amended)** The mobile communication terminal according to claim 17, wherein entries in at least one of said service type list have different priority among each other.

19. **(Previously Presented)** The mobile communication terminal according to claim 18, wherein an assessment criterion is defined for the priority.

20. (Previously Presented) The mobile communication terminal according to claim 19, wherein the assessment criterion is user-defined.

21. (Currently Amended) The mobile communication terminal according to any one of claims 18-20, wherein said mobile communication terminal is operable such that ~~said~~ each service type list can be shown on a display device on said mobile communication terminal, and further comprising selection means for selecting a service of a desired service type from ~~said~~ a displayed service type list.

22. (Currently Amended) A mobile radio arrangement, comprising:
at least two mobile radio networks, each said mobile radio network associated with a radio communication standard, each said mobile radio network further comprising a plurality of mobile communication terminals;

wherein each said mobile communication terminal is operable for at least two mobile radio networks, each said mobile radio network providing a user of said mobile communication terminal with a plurality of services of different types;

wherein at least two said mobile radio networks are operable for transmitting data records, each said data records associated with a plurality of said services, and said data records contain information used by said services to be assessed by a user;

wherein at least two mobile radio communication systems provide the mobile communication terminal at least one service of the same service type; and

wherein the data records are used in the form of a plurality of service type lists , each service type list corresponding to a different one of the plurality of different service types, ~~the list for each particular service type and~~ listing only services of ~~the same one particular service~~ type which are provided by any of said mobile radio networks.
